

New Spring Styles of the celebrated Hagan Shoes now ready for Men who want the new styles first—\$8.99, \$6.50 and \$7.99. You know what "Hagan" stands for—it is a synonym of quality. Here only, in Bisbee.

Men's Suits to Order at Special Clearance Prices

The reason—the clearance time—we want to rid the shelves of every piece of Fall and Winter Suits before the Spring Suits arrive, and we want to keep our large force of tailors busy for the next few weeks.

To do this and get new customers acquainted with our system of tailoring in this rapidly growing department, we smash the prices in such a way that the man who needs a new suit can't help but order now.

We give you the same expert cutting, the same standard of workmanship and the same linings and trimmings you would get here at any other time and paid full price. It's a bona fide clearance and every piece of Fall and Winter Suits in the house (except staple blues and blacks) will be made to your special order for the next few days at these special prices.

\$30 to \$35 Suitings— Made to your order	\$27.50
\$36.50 to \$40 Suitings Made to your order	\$32.50
\$42.50 to \$50 Suitings Made to your order	\$37.50

BOURNE TELLS OF NEW LAWS HE ADVOCATES

Mentions Railroad Rate Regulation, New Act of Election Rules, Etc.—Speaks of the Mammoth Copper Property.

PHOENIX, Jan. 16.—"I consider legislation touching rate regulation and the amendment of our election laws the most important bills to come before this session of the legislature," J. P. N. Bourne, Democratic member of the lower house from Pinal county, who is here to remain until the legislature opens next Monday, expressed himself in these words this morning.

"Over in Pinal county we feel the need of railroad legislation as much as any section of the territory. Some of our needs are so glaring that I think even the railroads would be willing to concede that our claims are just," continued Bourne.

"As far as changes in the election laws, it would probably be more correct to say that we need an entirely new set of laws. We need now registration laws, should give the people the right to select their candidates at a primary and then fix the conditions for the general election in such a manner as to prevent dishonest persons controlling."

Bourne is now manager of the famous Mammoth mine in Pinal county, which was years ago one of the big ore producers. It has since been involved in litigation, which has been adjusted.

"Several different parties are negotiating for the Mammoth property now," remarked Bourne, "and I would not be surprised to see a deal put through before long that will mean the resumption of working of this property, which had a forty-foot vein of ore in the bottom of its 300-foot shaft when work was closed down."

"Since the mine has been idle the shafts have been full of water, and much of the timbering has rotted, but this could be replaced by pumping out the mine and opening up the workings."

"There is just now much activity adjacent to Mammoth. The Cabernet & Arizona people only ten miles away are hauling in a large amount of lumber and material. They will erect at once a store building, two big bunk houses, eating houses and offices."

"In my opinion it is only a question of a little time until a railroad is built from the Southern Pacific main line into our district. The Cabernet & Arizona people, and several other companies that are now doing a great deal of work in the road."

Some few years ago there was an oil excitement at Mammoth, which Bourne says may be revived before long, as things are being gotten in such shape that drilling well may be bored to prospect the oil field. One well was sunk 700 feet when work was stopped through a disagreement among the interested parties.

PHOENIX, Jan. 16.—Discovering trachoma, an affliction of the eyes, which the federal government considers serious enough to warrant barring immigrants so afflicted, among some of the pupils, the trustees of the Osborn school have issued strict orders that all children suffering from the disease must be kept away from the school until cured of there is no longer danger of contagion.

To stamp out the disease before it gains a further foothold, the Osborn trustees have requested County Health Officer Hughes to take charge of the matter and examine pupils suspected of being afflicted. As cases are discovered they will be cared for.

Contagion is believed to have spread among a few of the Osborn pupils from contact with the children of the Indian school. It is a disease that easily spreads, via nap on the same towel or using the same wash bowl as an infected person being one of the most common means.

Recently it is said that the same disease was discovered among the children in the Phoenix schools, and the matter given some consideration by City Superintendent Stilwell and the school board, which finally decided that it would be too expensive to have every child examined.

In cases where the disease is permitted to run without treatment it often results disastrously to the eye sight and health of the victim. It has been suggested that the matter be considered further by the Phoenix trustees, who might require parents to have their children examined and furnished with a certificate showing they are free of the disease. All those who cannot furnish certificates should be barred from the schools until they are no longer a source of contagion.

"Meat may cause crime," says a writer for a vegetarian periodical. It does. As witness the robbery of the people by the Meat Trust.

SEE DECLINE AMONG THE FRENCH RACE

Decay Said To Be Due To Drink and Improper Mode of Life. How It Affects the Nation's Army.

PARIS, Jan. 16.—For years past we have been hearing a good deal about the depopulation of France, and now to this lamentation is being added a wall over the alleged degeneracy of her people. It was to be a case of quantity so far as the population is concerned, quality at least would have been some consolation; but if alarmists are to be credited the French cannot even lay claim to that. It might have been thought that in the matter of physical endowments the French, whose genius has certainly not declined, could hold their own, seeing that their nation, are alert, nimble and gifted with uncommon powers of endurance. But if two members of the Council General of the Department of the Seine are to be believed, things are in a very bad way. They say that the physical degeneracy of the French race is only too evident. Sociologists have already drawn the attention of the authorities to it. One cause of this unfortunate state of things is to be found in the fact that physical training is neglected for moral and intellectual education, so that the balance between them is not maintained.

Under the influence of a number of causes, especially distress, alcoholism and evil living, our social body is proceeding to terrible decadence. "La France se dissout," M. Rouvier, the former Minister, is said to have said.

The two Councilors-General express the opinion that if the mischief is to be remedied its full extent should first be ascertained, so they propose that the Government be invited to institute an investigation next year in every department, with a view to finding out the exact number of the young men who have been pronounced to be unfit for military service, and of the recruits who, after having been sent to regiments, have been dismissed because they were not up to the mark.

If the two alarmists gain their point the result of such an inquiry will certainly be awaited with a certain amount of interest. It is, of course, a well known fact that some proportion of the youths brought up in large towns are deficient from the point of view of physique, but the same status can be noticed in every country. On the other hand, the lads recruited from the rural populations are for the most part remarkably sturdy, and will bear comparison with their fellows in every land. The same status can be noticed in every country. White, deputy sheriff, illegal mileage, \$9.20—9.20
Total—\$115.25
Total deduction—\$1101.25

The Earth's Visibility.

As we look up through the transparent atmosphere on a clear night and see the moon beaming brilliantly down upon us we may think, "What a wonderful sight the continents and oceans of the earth would present if we could view them from the moon!"

According to the conclusions of the director of the astrophysical observatory of the Smithsonian institution, a man on the moon would catch but feeble glimpses of the outlines of our continents. "The true radiating surface of the earth as a planet," says the scientist, "is chiefly the water vapor at an elevation of 4,000 meters (12,600 feet or more above the sea level.)" In consequence the moon in the moon would see the features of the earth dimly outlined in the glare of light reflected from the atmosphere.

—Youth's Companion.

Stock List.

NEW YORK, Jan. 16.—Amalgamated Copper, \$8.87; Smelter, \$8.87; Atchafalpa, \$109.57; St. Paul, \$149.12; New York Central, \$129.87; Pennsylvania, \$123.27; Reading, \$174; Southern Pacific, \$119.75; Union Pacific, \$189.12; Steel, \$52.50; Steel, preferred, \$112.12.

Metal Market.

NEW YORK, Jan. 16.—The metal markets were quiet in the absence of cables. Spot tin is quoted at \$27.50@27.75. Copper appears to be unsettled, with lake quoted at \$14.00@14.25 1-2; electrolytic, \$14.00@14.12 1-2; and casting \$12.57@12.60. Lead is easy at \$4.15@4.20. Spelter dull, \$5.12 1-2@5.27 1-2.

SENATORS DISCUSS MANY MEASURES

WASHINGTON, Jan. 16.—An elaborate analysis of the Sherman Anti-Trust law by Judge Jenkins of Wisconsin, was a feature of today's session in the house. The pension appropriation bill, technically, was under consideration, but the time was all given over to a general debate. Other speakers were Nye of Minnesota, who entertained the house with an address on law and law making, Douglas of Ohio who advocated autonomy for the Porto Ricans and Burton of Delaware who made the plea for postal savings banks.

Many newspapers throughout the Northwest are arranging popular contests and boys and girls numbered among the winners will be taken in special cars to view the Alaska-Triton-Pacific Exposition at Seattle. This will be an educational as well as a pleasure trip.

Man and Woman.

Father Vaughan of London, preaching on marriage, remarked that a woman said to him: "When you have seen one man you have seen them all in their moods and tempers. They are all alike." His reply was: "It may be so, but woman is like an irregular French verb, and unless a man studies her in all her peculiar moods and tempers he will misconstrue and misunderstand her, much to his disadvantage."

Why has not somebody risen to remark that the Taft Cabinet won't be able to resist Knox.

SCHWARTZ BROTHERS

Nettleton Shoes
and others

Hart Schaffner & Marx Clothes
and no others

Just a word, gentlemen about soles. You see many soles advertised, but are they on articles tried and known like those mentioned above.

We can not cut prices on H. S. & M. CLOTHING TO NOTHING, but at the end of Season we do give you the profits.

You should buy a H. S. & M. Suit at 20 per cent off

\$16.00 for a \$20.00 Suit

\$20.00 for a \$25.00 Suit

\$24.00 for a \$30.00 Suit

All are nobby, up-to-date patterns and all good sizes.

Nettleton Patent Leather Shoes
\$6 to \$7 value - - - \$4

All Florsheim Shoes, patent
Kid and Calf \$5 values \$3.50

Selz, Burt & Packard \$3.50
and \$4 Shoes each pair \$2.50

Schwartz BROTHERS

The Safe Place Main Street

STAGE DAILY
(except Sundays) to and from Leadville, Courtland and Gleason. Leaves Brophy's stables, Lowell and Leadville at 8:00 a. m. sharp. Fare each way \$3.50; 50 pounds baggage free.

A STRANGE LAKE.

Sulphur Island's Acid Waters Will Eat Up Boats.

A strange lake exists in the center of Sulphur Island, off New Zealand. It is fifty acres in extent, about twelve feet in depth and fifteen feet above the level of the sea.

The most remarkable characteristic of this lake is that the water contains vast quantities of hydrochloric and sulphuric acids hissing and boiling at a temperature of 110 degrees F.

The dark green colored water looks particularly uninviting. Dense clouds of sulphuric fumes constantly roll off this boiling cauldron, and care has to be exercised in approaching this lake to avoid the risk of suffocation. On the opposite side of the lake may be seen the tremendous blowholes, which when in full blast present an awe inspiring sight.

The roar of the steam as it rushes forth into the air is deafening, and often huge boulders and stones are hurled out to a height of several hundred feet by the various internal forces of nature.

A boat can be launched on the lake and if proper care be observed the very edges of the blowholes may be safely explored.

Some idea of the strength of the acid saturated water of this lake may be gathered from the fact that a boat almost dropped to pieces after all the passengers had been landed, as the rivets had corroded under the influence of the acids.

Strange Race of Ancient Britons.

Among the races of humankind which away back of history's records passed like clouds over various parts of the earth one of the most puzzling to ethnologists is that of the early bronze age men who dwelt in Aberdeenshire, Scotland, and are supposed to have constructed the special forms of stone circles whose remains are now found there. These men differed significantly, says J. Gray, from all the prehistoric racial types previously determined in Britain. They were remarkably broad headed, and their average stature was only five feet three inches, as shown by skeletons. The British neolithic race was markedly long headed, and the bronze age race, which built the round tumuli, was also long headed and tall.

Man and Woman.

Father Vaughan of London, preaching on marriage, remarked that a woman said to him: "When you have seen one man you have seen them all in their moods and tempers. They are all alike." His reply was: "It may be so, but woman is like an irregular French verb, and unless a man studies her in all her peculiar moods and tempers he will misconstrue and misunderstand her, much to his disadvantage."

Why has not somebody risen to remark that the Taft Cabinet won't be able to resist Knox.

January 16, 1909.

Dear Friend:

We like molasses so well at our house that Mama sent me downtown to get a jug full so big that I could hardly carry it home.

I made an ugly face while I was carrying the molasses home, but when I had some on my cakes for breakfast this morning you ought to have seen me smile. I got a whole gallon jug full for 75 cents.

Your friend,
Jacob.

P. S. You can get the best molasses and the best of everything to eat at
